

ABSTRACT

1 A wrist rest capable of vertically storing up keyboard includes a wrist rest, at
2 least a movable piece and at least one wall plate. The movable piece is kept in the
3 interior of the wrist rest body in way of being able to slide out of the wrist rest body
4 and is pivotally connected to the wrist rest body. The wall plate is pivotally
5 connected to the movable piece and is able to rotate a preset angle and held in position.
6 The keyboard can rest against the wall plate after the wall plate has been rotated to the
7 preset angle.
